

PRODUCT DATA SHEET

FOOD GRADE GREASE EP 2 (H1)

Commercial / Pack Name: FOOD GRADE GREASE EP 2 (H1)

Product Description

- Premium H1 food-grade grease formulated from highly refined white base oils, food-grade thickener and performance additives.
- Designed for bearings and equipment where incidental food contact may occur.
- Excellent water resistance, mechanical stability and oxidation resistance.
- Provides outstanding wear protection and corrosion resistance.
- Suitable for a wide range of food processing applications.

Key Performance Benefits

- Excellent load carrying capability.
- Outstanding resistance to water washout.
- Superior oxidation and mechanical stability.
- Excellent rust and corrosion protection.
- Long service life with reduced relubrication frequency.

Applications

- Food and beverage processing plants.
- Bakery, dairy and meat processing equipment.
- Conveyor bearings, rollers and packaging machinery.
- Pharmaceutical and cosmetic manufacturing equipment.
- General anti-friction bearings operating in food processing environments.

INDUSTRY PERFORMANCE CHARACTERISTICS

- Excellent water resistance
- High mechanical stability
- Outstanding anti-wear performance
- Excellent corrosion protection
- Long grease life

Typical Characteristics

Characteristics	EP 2 (H1)
Appearance	White
NLGI Grade	2
Thickener	Aluminium Complex
Base Oil Viscosity @40°C	220 cSt
Worked Penetration	265-295
Dropping Point	260°C Min
Operating Temperature	-20°C to +160°C
